

Please do not water down the federal version of the proposed No Not Call List. set the minimum to Indiana standards. I have afraid that the special interest groups will try to water this action down. Having been on the Indiana list for almost a year now, and I do not miss the telemarketers calls. Before I was on the list telemarketers do not call list, my family were trying to get ahold of us due to death in the family (took them over 4 hours in one evening).
